💼 Experience

Intern
Accenture
October 2021 - November 2021
I assisted in the development of a computer vision AI to detect illegal deforestation

Intern
Comet
October 2022 - present
Assisting in the development and flight tests for the company website

Tutor
Accenture
December 2017 - present
every year since I was 12 I have taught the "Hour of Code" curriculum to children of all Accenture employees at the Melbourne, Australia office

🎓 Education

High School Diploma
January 2019 - present
Cherry Creek High School

<> Projects

Google Foobar Automation
Python
I automated Google's "Foobar" hiring process using a selenium webscraper.

Car Segmentation AI
Python, JupyterNotebook
I created an AI using OpenCv and PyTorch that can detect cars from dashcam footage as a way to educate myself about how self driving cars might work.

React Portfolio
Javascript, Sass, React.js, firebase
I built a portfolio to advertise some of my skills using react. (does not work on phone yet)
